W.C. Welbourn, Gainesville, FL, USA

GENERAL INFORMATION - The International Journal of Acarology (ISSN # 0164-7954) publishes original work on a wide variety of acarological subjects, including mite and tick behavior, biology, control, ecology, genetics, morphology, physiology, systematics and taxonomy. To ensure continued quality of journal content, manuscripts submitted to IJA are critically reviewed by six or more members of the Editorial Board and other acarologists who are specialists on the subject matter. The language of choice for IJA is English but manuscripts written in other languages may be considered.

The International Journal of Acarology, editors, editorial board and publisher assume no responsibility for statements or opinions expressed by the author(s) or for claims made in advertisements published in this journal. Indira Publishing House is free to distribute reprints of papers published in IJA, allow others to use material published in IJA, and dispose of any material (including articles, drawings, figures, photos and tables) received for publication as deemed appropriate.

Papers published in IJA are not to be reproduced or stored by any electronic means for distribution without prior written permission from Indira Publishing House. Authors, however, are free to duplicate their papers for teaching or research purposes.
